

Experience

Blurbs - New York, New York

Full Stack Developer

October 2025 - Present

- Worked with stakeholders to design and develop an AI chatbot leveraging RAG, improving customer vendor discovery and decision-making.
- Implemented interactive React dashboard features that improved usability and accessibility for end users.
- Guided AI strategy and integration, ensuring alignment with existing infrastructure and business goals.
- Utilized Claude Code within Agile sprints to accelerate feature development, reducing implementation cycles for AI and frontend functionality.
- Leveraged Next.js Server Components to improve page load times and reduce bundle size for the RAG chatbot and React dashboard.

Infinity Lumber - Brooklyn, New York

Web Developer

June 2022 - October 2025

- Built a company website with React, Typescript, and CSS, improving brand presence and delivering an accessible, user-friendly experience.
- Deployed Google Cloud Platform infrastructure supporting remote inventory management and secure user authentication.
- Created a responsive internal dashboard for streamlined invoice processing and automated inventory tracking.

Projects

Floatmana.app

Card Game Utility Site

- Engineered a React-based single-page app integrating AI to deliver personalized card recommendations.
- Created a scalable data architecture using PostgreSQL and Next.js, developing RESTful endpoints to optimize card querying and AI integration.
- Accelerated development cycles by leveraging Claude Code to rapidly prototype and implement features.
- Deployed and maintained production infrastructure on AWS, ensuring reliable performance and seamless user experience in production.

Game of Twenty Squares

Web Game

- Engineered scalable state management with Redux, enabling a more modular and extensible application structure.
- Built a heuristic-based AI model to analyze, score, and execute optimal moves in real-time against human players.
- Developed a fully responsive interface leveraging Flexbox and CSS Grid to ensure seamless cross-device compatibility.

Education

Designing and Building AI Products and Services

MIT xPro

Learned how to strategically assess business problems and design an effective AI solution using the skills listed below.

B.S. Computer Programming and Information Systems

Farmingdale State College, NY

Concentration in Web Development and a minor in Sociology.

Skills

Languages: Javascript, Typescript, Python, HTML, CSS, JSX, PostgreSQL, SQL, C#, Java

Frontend: React, Redux, Webpack, Styled Components, Bootstrap, Storybook, Lodash, React-Responsive

Backend: RESTful routing, Express.js, Next.js, Firebase, Node.js

Cloud: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP)

AI: Claude Code, Machine Learning, LLM, RAG, Word Embedding, Generative Adversarial Networks, Neural Networks

Apps: GitHub, VS Code, Docker, VIM, Linux, Postman, Adobe Photoshop, Quickbooks Online
